X @claudioscheer

## EXPERIENCE

### Data Scientist [part-time]

#### Varos

📅 Jan 2024 – Sept 2024    📍 Brazil

- Enhanced content quality assessment by developing and deploying machine learning models on AWS, capable of classifying news and predicting social media suitability with high reliability and scalability
- Streamlined data processes by building custom datasets and pipelines, reducing preprocessing overhead and improving model training efficiency for robust end-to-end solutions

### Senior Software Engineer

#### Upstart 13

📅 Sept 2022 – Ongoing    📍 USA

- Contributed to multiple high-impact projects, focusing on one at a time. Below are key achievements:

##### SnapHOA

- Delivered a production-ready mobile app for iOS and Android using React Native, achieving 2000+ downloads within 2 weeks
- Maintained a 100% crash-free rate and optimized performance through lazy loading, caching, and other techniques

##### Ironside Group

- Designed a scalable API integrating data from 5+ sources, automating workflows and enhancing reporting accuracy
- Reduced ETL pipeline processing time by 60% and ensured API response times under 200ms using AWS and Python

### Tech Lead [part-time]

#### Setrem

📅 Ago 2021 – Ongoing    📍 Brazil

- Architected and deployed scalable systems, driving performance, scalability, and operational efficiency while modernizing legacy systems
- Led technical strategy and mentorship, defining architectures, fostering collaboration, and ensuring timely delivery of high-quality solutions aligned with best practices

### Senior Software Engineer

#### Kinect Consulting

📅 Nov 2021 – June 2023    📍 USA

- Enhanced resource tracking and management by developing FocalOps, a SaaS platform integrating Jira and Workday, with seamless data synchronization pipelines and a robust Jira webhook ensuring real-time updates for over 1,000 users
- Improved deployment efficiency and scalability by automating cloud infrastructure with Terraform and building reliable serverless applications on AWS in collaboration with cross-functional teams

## SUMMARY

Software engineer with 10+ years of experience building scalable systems and AI-driven solutions. Proven ability to deliver impactful results by optimizing workflows and enhancing system performance. Skilled in software development and machine learning, with a track record of improving efficiency and user experiences across diverse projects.

## SKILLS

### Programming Languages

Python    Go    Node.js    C++    C#

### Tools & Frameworks

React    PyTorch    Terraform

GitHub Actions

### Databases

PostgreSQL    MySQL    DynamoDB

### Cloud & Containerization

AWS    Docker

### Soft Skills

Strong communicator

Enhances collaboration

## LANGUAGES

English

## EDUCATION

### M.S. in Computer Science

#### PUCRS

📅 Marc 2020 – May 2023

Utilized reinforcement learning and neural networks to optimize GPU parallelism, significantly reducing the time required for developers to determine optimal thread-per-block configurations in large combinatorial spaces.

### B.S. in Information Systems

#### Setrem

📅 Febr 2015 – Sept 2019
